BTEC SPORTS FITNESS

(SINGLE AND DOUBLE AWARD)

What will I study?

Students develop the skills required in the fields of personal fitness. In addition, they acquire the range of teamwork, professional and personal life skills needed in any career. They also study in depth the sports industry.

Students learn about fitness for health and well-being as well as being introduced to the body systems that are associated with health and fitness, plus an understanding of basic anatomy and physiology.

There are opportunities to explore adventurous activities and teamwork, along with the benefits of outdoor activities to further their own skills development and future work or training.

Worth 2 A Levels – double option

- Anatomy and Physiology
- Fitness training and programming for health, sport and well-being
- Professional development in the Sports Industry
- Application of fitness testing
- Sports Psychology
- Practical sports performance
- Technical and tactical demands of sport
